Prodrive CMS is characterized by

- ✓ Integration of customer designed products in our manufacturing facilities including continues process & quality control, test strategy and high level of automation
- ✓ Strong and well positioned supply chain management acting on global scale to ensure availability of materials and competitive pricing
- ✓ Over 700 engineers with knowledge in specific processes, materials, technologies and markets
- ✓ Proven track record of cost savings of more than 15% by extensive Design for Manufacturing, Design for Test and Design for Cost support
- ✓ Strong collaboration with the Prodrive Industrial Automation program for tailored automation solutions for highest efficiency in production of customer products

Medical products manufactured by Prodrive

- PCB assemblies
- HMI`s
- Power Modules
- Control Modules
- Drive modules
- Control and Power cabinets
- Mechatronic solutions
- Products and machines
